

# Art Club

This half term, our art club members have been fearlessly exploring the world of sculpture! They've been mastering the art of manipulating clay and wire, bringing their creative visions of crows to life. These impressive sculptures are nearing completion, and the exciting final step will be adding colour. Along the way, our students have honed their problem-solving skills, tackling the challenges of securely attaching their wire armatures to the plinths and ensuring the structures are strong enough to support the weight of the clay. It's been a fantastic journey of artistic discovery!

Well done to all!
